... LEADERSHIP ...

IT STARTS WITH YOU

## Keeping post-secondary education affordable

### Post-secondary education is growing out of reach

For students and their families, it's getting harder to save for post-secondary education, let alone manage the debt that can follow. Yet skills training and college or university education can be what sets Canadians on the path to growth, hope and opportunity.

### Where is the federal leadership?

To stay competitive on a global scale, the future of Canada's economy depends on highly educated and skilled individuals in various trades and industries. Yet Stephen Harper's Conservatives are not doing anything to help.

### Liberals stand for affordable access to post-secondary education

The Liberal Party of Canada believes firmly that all Canadians deserve affordable access to education.
